Nagpur, India — Immediate Joiner — Open to Remote & On-site

Professional Summary

Flutter Engineer with **1 year of production experience** building scalable healthcare mobile applications. Contributed to a **live Google Play Store app** used across **40+ hospitals**, integrating **50+ REST APIs**, AI-powered voice-to-text and discharge summary workflows, real-time WebSocket features, and performance optimizations resulting in a **28% faster startup time** and **95%+ crash-free rate**.

Technical Skills

- **Languages:** Dart, Flutter
- **Architecture:** Clean Architecture, MVVM, Repository Pattern
- **State Management:** BLoC/Cubit, Riverpod, Provider
- **Backend & APIs:** Firebase (Auth, Firestore, Storage), REST APIs, Dio, SQLite, Secure Token Management
- **Real-Time:** WebSockets, Socket.IO, Firebase Realtime Sync
- **Tools:** Git, Android Studio, Postman, Flutter DevTools, Maestro (E2E), Flutter Flavors (Dev/QA/Prod)

Professional Experience

Flutter Engineer – ClientDriven Solutions

Aug 2025 – Present

BonoRx: Production healthcare platform used by **40+ hospitals**, live on Google Play Store

Remote

- Architected and maintained the Flutter frontend across **120+ files** using **Clean Architecture**, **14 BLoCs**, **7 repositories**, and multi-flavor environments (Dev/QA/Prod).
- Integrated and maintained **50+ production REST APIs** using Dio with automatic token refresh, secure authentication, and centralized networking.
- Developed real-time patient queue management using **Socket.IO** with automatic reconnection and room-based events, alongside live audio streaming over raw **WebSockets** with Firebase Storage integration.
- Delivered AI-powered healthcare workflows including voice-to-text transcription, AI-generated discharge summaries, and PDF e-prescriptions, reducing manual documentation time by **80%** and accelerating discharge workflows by **5x**.
- Improved application startup performance by **28%** (1981ms → 1430ms) through Flutter DevTools profiling and deferred initialization while maintaining a **95%+ crash-free rate**.

Tech Stack: Flutter • Dart • BLoC/Cubit • Riverpod • Firebase • Dio • REST APIs • Socket.IO • WebSockets • AI Integration • Maestro • Git

Personal Projects & Open Source

flutter_profile_mcp – Published Flutter Package

[pub.dev] [GitHub]

- Published open-source Flutter package on **pub.dev** enabling AI assistants to access Flutter developer profiles using the **Model Context Protocol (MCP)**.
- Built reusable APIs with complete documentation, making the package easy to integrate into AI-powered developer workflows.

Expenso – Offline Expense Tracker

[GitHub]

- Built offline-first expense tracker using **Flutter**, **SQLite**, and **BLoC** with complete CRUD, category filtering, and monthly/yearly analytics dashboards.

ShopSphere – E-Commerce Application

[GitHub]

- Built complete e-commerce app with authentication, product browsing, cart, checkout and REST API integration using Clean Architecture and BLoC.

NewsApp – News Aggregator

[GitHub]

- Built modular Flutter news app consuming real-time News API with shimmer loading, carousel banners, and flutter_bloc state management.

Open Source: Published Flutter package • 497+ GitHub contributions (2025)

Education

Bachelor of Computer Applications (BCA) – Cybersecurity

Manipal University Jaipur

CGPA: 8.87/10.00

Aug 2024 – Present

Jaipur, Rajasthan

Certifications

- **Flutter App Development** – WsCube Tech (A+ Grade)
- **KodeKloud Engineer Program** – Linux Level 1
- **Deloitte Cyber Job Simulation** – Forage
